Skills & Tools

Front-End: HTML | CSS | Javascript | jQuery | React | AngularJS | Bootstrap | JSON

Back-End: PostgreSQL | PHP | MongoDB | RESTful API | Node.js | Express

Version Control: Git | Github

Projects

Beer Detective - Developed a front end web application that accessed the breweryDB API with AJAX. Created DOM elements with jQuery.

Vulture - Designed a multi-page app with Express and Javascript that stored user inputs in a MongoDB database via Mongoose. Created full CRUD app that allows users to log in and view all user posts, create new posts, and edit or delete their own posts.

World Explorer - Collaborated with group members to create a MEAN stack app that allows users to share, like, and favorite locations around the world. Utilized AngularJS to make the app a single page that simulates a multi-page app.

Llam-O-Rama - Worked with a partner to create a llama themed store using a React.js front-end and wrote the API in php to connect to a postgresQL database.

The Fickle Parent - Created an API and front end in 10 days. Employed Apache and PHP to store data posted from a React app and visualized data with Chart.js. Users were authenticated with Firebase Authentication, and allowed for emails to be sent via SendGrid.

Professional Experience

Quality Compliance Specialist, Takeda Pharmaceuticals, Boston, MA | 2018 - 2019

Digital Marketing Assistant, Self-Employed, Hopkinton, MA | 2018

Document Control Specialist, Biostage, Holliston, MA | 2017
